

# Bottled Water Delivery System

SHURflo's New Bottled Water Delivery System offers great performance and reliability for commercial and household use.

This self-contained system incorporates the latest cutting-edge pump technology to maximize flow and pressure while delivering, consistent and quite flow.

Designed with an automatic water level sensor that turns off the pump automatically when the bottle is empty. This system operates with a low voltage delivery pump for ultimate safety, and includes an optional mounting bracket allowing for under the counter or direct to wall mounting.

## Features Include:

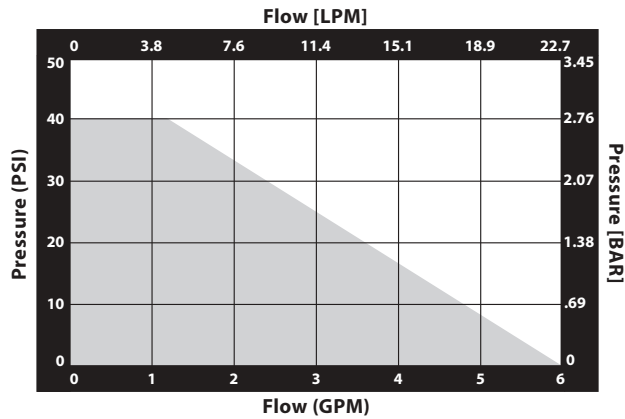

- ▶ Self contained Water Delivery System.
- ▶ Flow rate up to 1.0 GPM [3.8 LPM].
- ▶ Pressure up to 40 PSI [2.8 BAR].
- ▶ Available in 115 VAC and 230 VAC
- ▶ Low voltage pump for safety.
- ▶ Flexible dip tube prevents breakage when changing out bottle.
- ▶ Lightweight, compact housing allows for versatile mounting options.
- ▶ John Guest™ outlet port design.
- ▶ Sleek housing, appliance look design.
